GU-PLAST PVC REINIGER ANLÖSEND

MATERIAL SAFETY DATA SHEET

SECTION 1 - IDENTIFICATION

Product identifier : GU-PLAST PVC REINIGER ANLÖSEND
Product Code(s) : 9-38970-00-0-0
Product Use : Cleaning agent / Detergent
Chemical Family : Mixture.
Suppliers name and address: Manufacturer's name and address:
Ferco Ferrures de bâtiment
2000, rue Berlier
Laval, QC, Canada
H7L 4S4
Information Telephone # : (450) 973-1437
24 Hr. Emergency Tel # : Not available.

SECTION 2 - HAZARDS IDENTIFICATION

Classification : WHMIS information: This product is a WHMIS Controlled Product. It meets one or more of the criteria for a controlled product provided in Part IV of the Canadian Controlled Products Regulations (CPR). WHMIS classification: Class B2 (Flammable Liquids).

OSHA: This material is classified as hazardous under OSHA regulations (29CFR 1910.1200). Hazardous classification: Flammable liquid; Acute Health Hazard; Chronic Health Hazard.

Emergency Overview : Clear, colourless liquid. Fruity odour. WARNING! Flammable liquid and vapour. Vapour is heavier than air and will collect in low-lying places. Vapour may cause flash fire! May be harmful if inhaled or swallowed. May cause nausea, vomiting, headache and other central nervous system effects. May cause respiratory irritation. Prolonged or repeated skin contact may cause drying and irritation. Prolonged overexposure may cause liver and kidney effects.

POTENTIAL HEALTH EFFECTS:

Signs and symptoms of short-term (acute) exposure

Inhalation : May cause irritation to the nose, throat and upper respiratory tract. Symptoms may include pain, headache, nausea, vomiting, dizziness, drowsiness and other central nervous system effects.

Skin : Direct skin contact may result in little or no irritation.

Eyes : May cause mild eye irritation. Symptoms will include pain, redness and tearing.

Ingestion : May cause irritation of mouth, throat, and stomach. Symptoms may include pain, headache, nausea, vomiting, dizziness, drowsiness and other central nervous system effects.

Effects of long-term (chronic) exposure

: Prolonged or repeated contact may cause drying, cracking and defatting of the skin. Prolonged overexposure may cause liver and kidney effects.

Carcinogenic status : See TOXICOLOGICAL INFORMATION, Section 11.
Additional health hazards : See TOXICOLOGICAL INFORMATION, Section 11.
Potential environmental effects : See ECOLOGICAL INFORMATION, Section 12.

SECTION 3 - COMPOSITION/INFORMATION ON INGREDIENTS
GU-PLAST PVC REINIGER ANLÖSEND

**SECTION 4 - FIRST AID MEASURES**

**Inhalation**: Remove exposed person to fresh air immediately. If breathing is difficult, give oxygen by qualified medical personnel only. If breathing stopped, begin artificial respiration. Get medical attention.

**Skin contact**: Flush contaminated area with lukewarm, gently running water for at least 5 to 10 minutes or until the chemical is removed. Remove contaminated clothing. If skin irritation or rash occurs, seek medical advice/attention. Wash contaminated clothing before reuse.

**Eye contact**: Immediately flush eyes with plenty of water for at least 15 minutes. If irritation persists, seek prompt medical attention.

**Ingestion**: Never give anything by mouth to an unconscious person. Do NOT induce vomiting. Have victim rinse mouth with water, then give one to two glasses of water to drink. Obtain medical attention immediately.

**Notes For Physician**: Treat symptomatically. This product is a CNS depressant.

**SECTION 5 - FIRE FIGHTING MEASURES**

**Fire hazards/conditions of flammability**: Flammable liquid and vapour. Vapours may form explosive mixture with air. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure. Vapours are heavier than air and collect in confined and low-lying areas. Vapours may cause flash fire.

**Flammability classification (OSHA 29 CFR 1910.1200)**: Flammable Liquid Class 1B.

**Oxidizing properties**: Not expected to be sensitive to mechanical impact. Product will accumulate static charge. Mixtures of vapour and air at concentrations in the flammable range may be ignited by a static discharge of sufficient energy.

**Explosion data: Sensitivity to mechanical impact / static discharge**: Not expected to be sensitive to mechanical impact. Product will accumulate static charge. Mixtures of vapour and air at concentrations in the flammable range may be ignited by a static discharge of sufficient energy.

**Suitable extinguishing media**: Dry chemical, foam, carbon dioxide and water fog.

**Special fire-fighting procedures/equipment**: During a fire, irritating and toxic gases may be generated by thermal decomposition or combustion. Do not enter fire area without proper protection. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame.

**Hazardous combustion products**: Carbon oxides and other irritating fumes and smoke.

**NFPA Rating**: Health: 1  Flammability: 3  Instability: 0  Special Hazards: None

**SECTION 6 - ACCIDENTAL RELEASE MEASURES**

**Personal precautions**: Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment including self-contained breathing apparatus. Refer to Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.

**Environmental precautions**: Do not allow material to contaminate ground water system. For large spills, dike the area to prevent spreading.
**Spill response/cleanup**

Ventilate area of release. Eliminate all ignition sources. Remove combustible materials. Stop the spill at source if it is safe to do so. Use only non-sparking tools and equipment in the clean-up process. Contain and absorb spilled liquid with non-combustible, inert absorbent material (e.g. sand), then place absorbent material into a container for later disposal (see Section 13). Contaminated absorbent material may pose the same hazards as the spilled product.

Notify the appropriate authorities as required.

**Prohibited materials**

Do not use combustible absorbents, such as sawdust.

**Special spill response procedures**

If a spill/release in excess of the EPA reportable quantity is made into the environment, immediately notify the national response center in the United States (phone: 1-800-424-8002).

US CERCLA Reportable quantity (RQ): ethyl acetate (5000 lbs / 2270 kg).

---

**SECTION 7 - HANDLING AND STORAGE**

**Safe Handling procedures**

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Bond and ground transfer containers and equipment. Do not use near welding operations, flames or hot surfaces. Inspect containers for leaks before handling. Label containers appropriately. Ensure adequate ventilation. Avoid breathing vapour or mist. Avoid contact with skin, eyes and clothing. Keep away from heat, sparks, and open flames. Prevent buildup of vapours. Keep away from oxidizing agents and incompatibles. Keep containers closed when not in use. Empty containers retain residue (liquid and/or vapour) and can be dangerous.

**Storage requirements**

Store in a cool, dry, well ventilated area, away from heat and ignition sources. Store out of direct sunlight. Keep away from incompatibles. Inspect all incoming containers to make sure they are properly labelled and not damaged. Keep container tightly closed. Storage facilities should be made of fire resistant materials. For large-scale storage, use a grounded, non-sparking ventilation system, approved explosion-proof equipment and intrinsically safe electrical systems. Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized personnel. Inspect periodically for damage or leaks. Have appropriate fire extinguishers and spill clean-up equipment in or near storage area. Recommended storage temperature: 15 - 25°C (59 - 77°F).

**Incompatible materials**

Strong oxidizing agents (e.g. hydrogen peroxide, nitric acid) and strong acids.

**Special packaging materials**

Always keep in containers made of the same materials as the supply container.

---

**SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION**

**Exposure Limits**

<table>

</tr>
</tbody>
</table>

**Ventilation and engineering measures**

Local exhaust ventilation is preferred to prevent contaminant dispersion into work area.

**Respiratory protection**

Respiratory protection is required if the concentrations exceed the TLV. NIOSH-approved respirators are recommended.

**Skin protection**

Impervious gloves must be worn when using this product. Advice should be sought from glove suppliers.
Eye / face protection: Chemical splash goggles are recommended. A full face shield may also be necessary.

Other protective equipment: Depending on conditions of use, safety shoes and additional protective clothing may also be necessary. An eyewash station and safety shower should be made available in the immediate working area.

General hygiene considerations: Avoid contact with skin, eyes and clothing. Avoid breathing vapour or mist. Do not eat, drink, smoke or use cosmetics while working with this product. Handle in accordance with good industrial hygiene and safety practice. Remove and wash contaminated clothing before re-use. Separate contaminated work clothes from street clothes.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

| Physical state | Liquid |
| Appearance | Clear colourless liquid. |
| Odour | fruity |
| Odour threshold | N/A |
| pH | N/A |
| Boiling point | 76°C (168.8°F) |
| Specific gravity | 0.9 |
| Melting/Freezing point | N/A |
| Coefficient of water/oil distribution | N/A |
| Vapour pressure (mmHg @ 20° C / 68° F) | 75 |
| Solubility in water | Moderate (79 g/L @ 20°C / 68°F) |
| Vapour density (Air = 1) | > 1 |
| Evaporation rate (n-Butyl acetate = 1) | N/A |
| Volatile organic Compounds (VOC’s) | N/A |
| Volatiles (% by weight) | N/A |
| Flash point | - 4°C (24.8°F) |
| Flash point Method | closed cup |
| Auto-ignition temperature | 460°C(860°F) |
| Lower flammable limit (% by vol.) | 2.1 |
| Upper flammable limit (% by vol.) | 11.5 |
| Flame Projection Length | N/A |
| Flashback observed | N/A |
| Viscosity | N/A |
| Absolute pressure of container | N/A |

Section 10: Stability And Reactivity

Stability and reactivity: Stable under the recommended storage and handling conditions prescribed. In the presence of water, product may slowly hydrolyze to ethyl alcohol and acetic acid.

Hazardous polymerization: Hazardous polymerisation does not occur.

Conditions to avoid: Avoid heat, open flames, sparks, static electricity and electrical equipment. Keep away from direct sunlight.

Materials To Avoid And Incompatibility: See Section 7 (Handling and Storage) for further details.

Hazardous decomposition products: acetic acid; Ethanol. Refer to Section 5 for additional ‘Hazardous combustion products’.

SECTION 11 - TOXICOLOGICAL INFORMATION

Target organs: Eyes, skin, respiratory system, digestive system, central nervous system.

Routes of exposure: 
- Inhalation: YES
- Skin Absorption: NO
- Skin & Eyes: YES
- Ingestion: YES

Toxicological data: There is no available data for the product itself, only for the ingredients. See below for individual ingredient acute toxicity data.

Ecotoxicity

No information available. The product should not be allowed to enter drains or water courses, or be deposited where it can affect ground or surface waters. This product contains the following substance which may also be hazardous for the environment: n-Butyl acetate; Ethyl acetate.

The acute toxicity of n-butyl acetate is (IUCLID):
- Toxicity to fish - LC50/96h/Pimephales promelas (Fathead minnow) = 18 mg/L
- Toxicity to daphnia - EC50/24h/Daphnia magna (Water flea) = 72.8 mg/L
- Toxicity to algae - EC50/72h/algae = 675 mg/L

The acute toxicity of ethyl acetate is (OECD):
- Toxicity to fish - LC50/96h = > 100 mg/L
- Toxicity to daphnia - LC50/48h = > 100 mg/L
- Toxicity to algae - EC50/72h = >100 mg/L

Mobility

No data is available on the product itself.

Persistence

No data is available on the product itself. Contains: n-butyl acetate; Ethyl acetate. n-Butyl acetate is considered to be readily biodegradable. Ethyl acetate is considered to be readily biodegradable.

Bioaccumulation potential

No data is available on the product itself. Contains: Ethyl acetate. The log Kow for ethyl acetate is 0.73 and its Bioconcentration factor (BCF) is 30 (fish).

Other Adverse Environmental effects

No data is available on the product itself.

Handling for Disposal

Store material for disposal as indicated in Handling and Storage (Section 7). Empty containers retain residue (liquid and/or vapour) and can be dangerous. Do not cut, weld, drill or grind on or near this container.

Methods of Disposal

Dispose in accordance with all applicable federal, state, provincial and local regulations. Contact your local, state, provincial or federal environmental agency for specific rules.

RCRA

If this product, as supplied, becomes a waste in the United States, it may meet the criteria of a hazardous waste as defined under RCRA, Title 40 CFR 261. It is the responsibility of the waste generator to determine the proper waste identification and disposal method. For disposal of unused or waste material, check with local, state and federal environmental agencies.

### SECTION 15 - REGULATORY INFORMATION

#### US Federal Information:

- **TSCA:** All listed ingredients appear on the Toxic Substances Control Act (TSCA) inventory.

- **CERCLA Reportable Quantity (RQ) (40 CFR 117.302):** ethyl acetate (5000 lbs / 2270 kg).

- **SARA TITLE III:** Sec. 302, Extremely Hazardous Substances, 40 CFR 355: No Extremely Hazardous Substances are present in this material.

- **SARA TITLE III:** Sec. 311 and 312, MSDS Requirements, 40 CFR 370 Hazard Classes: Fire Hazard; Immediate (Acute) health hazard; Chronic Health Hazard. Under SARA Sections 311 and 312, the EPA has established threshold quantities for the reporting of hazardous chemicals. The current thresholds are 500 pounds for the threshold planning quantity (TPQ), whichever is lower, for extremely hazardous substances and 10,000 pounds for all other hazardous chemicals.

- **SARA TITLE III:** Sec. 313, Toxic Chemicals Notification, 40 CFR 372: This material is not subject to SARA notification requirements, since it does not contain any Toxic Chemical constituents above de minimus concentrations.

#### US State Right to Know Laws:

- California Proposition 65: To the best of our knowledge, this product does not contain any chemicals known to the State of California to cause cancer or reproductive harm.

- Other U.S. State "Right to Know" Lists: The following chemicals are specifically listed by individual States: ethyl acetate (CA, MA, MN, NJ, PA, RI); n-Butyl acetate (CA, MA, MN, NJ, PA, RI).

#### International Information:

- **WHMIS information:** This product is a WHMIS Controlled Product. It meets one or more of the criteria for a controlled product provided in Part IV of the Canadian Controlled Products Regulations (CPR). Refer to Section 2 for a WHMIS Classification for this product.

- **Canadian Environmental Protection Act (CEPA):** Mixture. All components of this product are on the Canadian DSL list.

**This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and this MSDS contains all the information required by the CPR.**
