Door Multi-point Locking System

SECURY Automatic Door Lock for Lever Handle

Reference number	B	A	C
6-35856-01-R-8B	45 mm	792 mm	1590 mm
6-35856-02-R-8B	45 mm	1102 mm	1900 mm
6-36033-01-R-8B	50 mm	792 mm	1590 mm
6-36033-02-R-8B	50 mm	1102 mm	1900 mm
6-35565-01-R-8B	60 mm	792 mm	1590 mm
6-35565-02-R-8B	60 mm	1102 mm	1900 mm

Notes:

When using lever handle operation, please check handle height first
All dimensions must be verified on a prototype before production
Observe the proper slab to jamb clearance of 3-4mm

Veuillez d'abord vérifier la hauteur de la poignée avant d'utiliser la poignée à levier,
Toutes les dimensions doivent être vérifiées sur un prototype avant production
Respectez 3 à 4 mm de dégagement entre la porte et le montant de porte

Lever Handle Set Cutout

Handle height is set as per handle height line on lock faceplate as measured from bottom of door

La hauteur de la poignée est définie selon la ligne de hauteur de la poignée sur la tête de la serrure, mesurée à partir du bas de la porte

Notes:

Compatible with weather proof gaskets for 45mm and 55mm plates

Compatible avec les joints étanches pour plaques de 45 mm et 55 mm

Door Multi-point Locking System

Weather Proof Gasket For Handle Set Program -45mm Plates

Additional information

- Made of neoprene
- Achieved DP 100 (15psf/ 2,9in/water, 720pa) for water infiltration resistance
- Installs in proposed cut out shown below

Information supplémentaire

- Fabriqué en neoprène
- Testé DP 100 (15psf/ 2,9po/eau, 720pa) pour infiltration d'eau
- S'installe dans le perçage indiqué ci-dessous

Dummy plates kit instructions 55mm trim kit & 65mm trim kit

Do the following before installing the trims on the door!

What's in the bag

Pos	Qty	Description
①	2	Fixing plates
②	6	M4 x 5mm fixation screw

- ① Once all the components are assembled, mount the fixing plates inside both trims using the fixation screws. Make sure the handle is pointing towards the hinges side before inserting the fixing plate.

Door Multi-point Locking System

Installation Guide for Active Handle Trim Kit

Door Multi-point Locking System

Installation Guide for Active Handle Trim Kit

Loosen the set screws on both handles with the supplied Allen key.

ATTENTION!

Assemble at room temperature above 65° F. Place handle on soft cloth to avoid scratching.

Do not use mallet/hammer to snap ring in place, press with thumb.

EXTERIOR TRIM ASSEMBLY

Remove the gasket. Place nylon washer and then the "O" ring on handle shank against lever. Slide handle shank into handle hole. From backplate, place snap ring over handle shank and press with thumb as shown. Re-install the gasket.

INTERIOR TRIM ASSEMBLY

Place nylon washer on handle shank against lever. Slide handle shank into handle hole. From backplate, place snap ring over handle shank and press with thumb as shown.

Door Multi-point Locking System

Installation Guide for Active Handle Trim Kit

EXTERIOR TRIM

Slide spindle into handle square hole. The groove on the spindle should face the set screw as shown.

EXTERIOR TRIM INSTALLATION

Position the exterior trim into the holes, the cylinder tail (in horizontal position) through the cylinder bore and the spindle through the square hole on lockcase, and push the trim against the door.

INTERIOR TRIM INSTALLATION

Hold the exterior trim, position the interior trim over the spindle and push the trims against the door. The cylinder tail piece should slide horizontally through knob slot. Fasten with two installation screws (use flat screwdriver). Don't fully tighten yet!

CHECK FUNCTION!

1. The operation of the handles.
2. The operation of the cylinder (outside with key, inside with knob), make sure the dead bolt extends a full 1", and retracts fully.
3. Be able to remove the key in locked position and in opened position.

Fully tighten the installation screws. Fully tighten the set screws on the levers.

Installation Guide for Active Handle Trim Kit

HANDLES HANDING

CLOSING & LOCKING

UNLOCKING & OPENING

TROUBLESHOOTING

HANDLE IS HARD TO PRESS OR LIFT

Although some tension is required to activate the mechanism, excessive force should not be required. Loosen the installation screws 1/4 turn at a time. Re-adjust the handle by unscrewing the set screw on one of the handles.

PLATES ARE NOT TIGHT AGAINST THE DOOR

Installation screws are probably too long, file them down in short steps.

DEADBOLT IS HARD TO LOCK

Cylinder tail piece may be too long, it may be pushing against the interior knob. To release this pressure, file the excess length in short steps.

CARE & MAINTENANCE

To prevent build-up of surface contaminants, possibly resulting in hardware surface deterioration and in some case appearance of rust; we recommend to wipe down with soft cloth all visible surfaces with warm water and mild soap. Then wipe the same surfaces with a clean cloth and warm water only and let surfaces dry completely. This procedure should be done a minimum of 2 times per year.

The use of caustic cleansers or chemicals should be avoided.

For all finishes except Oil Rubbed Bronze (05), it is strongly recommended to apply a non-abrasive automotive wax to protect the surface.

In order to ensure the smooth operation of the lock over a long period of time, it is necessary to lubricate all movable parts and locking points using acid and resin-free lubricants .
