

Danalock app user guide: Key Activated Lock Calibration

Press DEVICE and select CALIBRATION in the settings list.
Choose MANUAL CALIBRATION in order to set-up latches retraction.

1. Manually turn the Danalock knob to unlocked position (with latches retracted) and press the green button

2. Then manually turn the Danalock knob to locked position (with deadbolt engaged) and press the red button

3. Press the blue button (Test Calibration) to confirm calibration was successful

WHEN CALIBRATION IS COMPLETE, YOUR LOCK IS READY FOR USE.
