GU-SECURY S-Bolt
Door Lock & Lever Handle

Edition 04.2025

GU-SECURY S-Bolt Locking System
for Single/Double Doors

G-U

FERCO
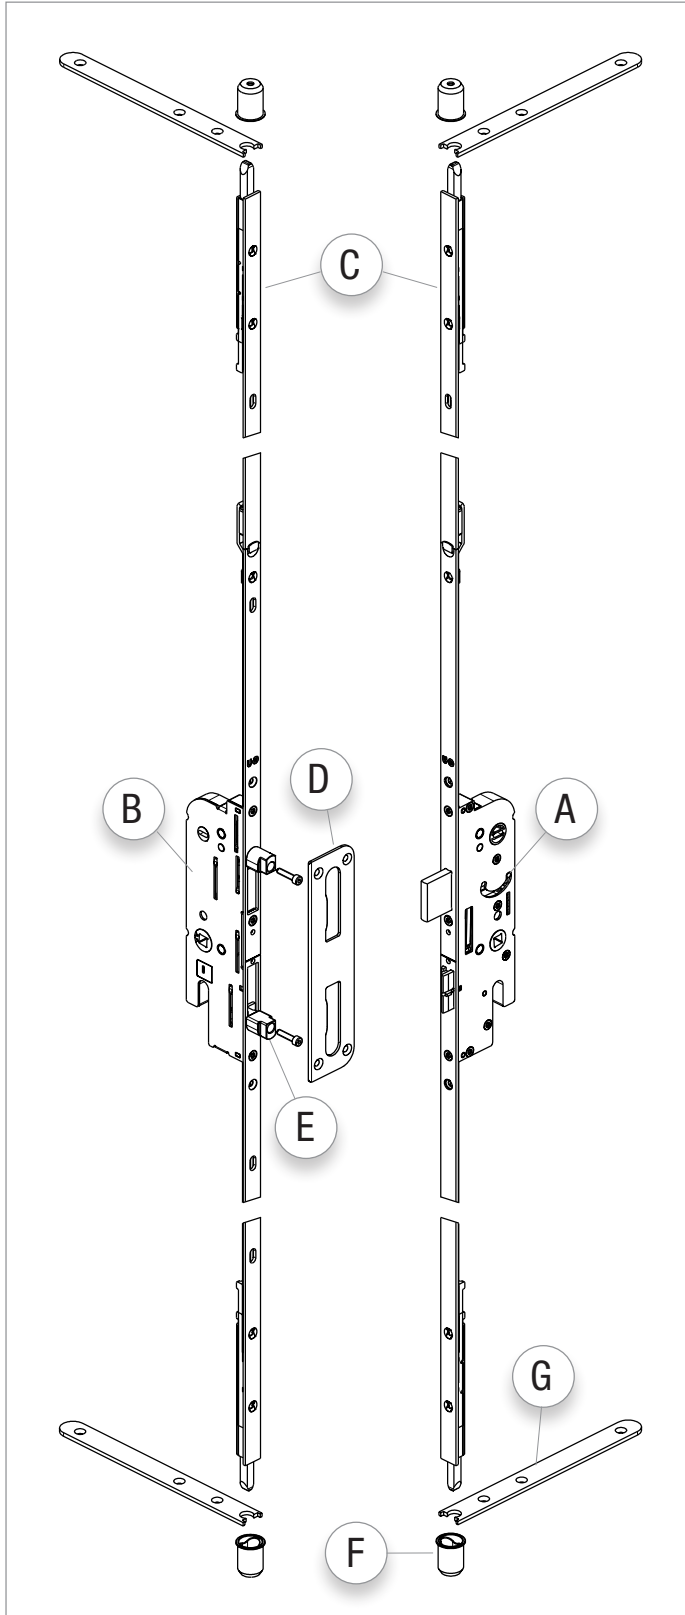

The Smart System for Double Doors

Ease of use, the system does not allow home owners to lock the active door unless the inactive door is fully locked.
This guarantees that both doors are fully locked and secured.

Full 1" shootbolts offer deeper penetration into the head and sill

Easy to connect the extension to the lock

Latch and deadbolt blockers are design for intuitive operation
Latch and deadbolt blockers are designed to provide communication between the semi-active and active door panel so both panels are lock in the correct sequence

Reversible latch with build-in anti-slam feature

Additional active panel three point locking options are SECURY hookbolt or Automatic latchbolt

Position	Description	Part Number
A	SECURY S-Bolt active door lock	6-39571-XX-0-8B
B	SECURY S-Bolt inactive door lock	6-39570-XX-0-8B
C	SECURY S-Bolt extension	6-39572-XX-0-8B
D	Center latch and deadbolt strikeplate	9-C4779-XX-0-11
E	Latch and deadbolt blockers	K-19658-XX-0-6
F	Shoot bolt strike cups	9-C4306-XX-0-0
G	16mm reinforcing strip for 10mm rods	9-C4315-00-0-8B
	20mm reinforcing strip for 10mm rods	9-C4316-00-0-8B

GU-SECURY S-Bolt Active Door Lock for Lever Handle

Description	Color	PU	Part Number
Door lock with 50mm backset	Stainless Steel	5	6-39571-02-0-8B
Door lock with 60mm backset	Stainless Steel	5	6-39571-03-0-8B
			PU = Packaging Unit

Additional information

- 3-point locking system for maximum security and protection against warping of the door panels
- Heavy duty mortise construction with reinforced lever return spring system
- Independent 90 degree locking and unlocking of deadbolt
- Lever controlled engaging and releasing the shoot bolts
- 1" (25mm) throw on deadbolt
- Two shoot bolts 1" (25mm) projection offer deeper penetration into the head and sill resulting in higher security and outstanding performance
- Non handed, latch with build-in failsafe (anti-slam) easily reversible
- Handle height 36" (915mm)
- 8mm spindle
- 92mm centres (spindle to cylinder)
- 16mm stainless steel faceplate
- Same hardware groove detail throughout our entire door lock program (router bits available)
- Used with shoot bolt extensions 6-39572-XX-0-8B

Introduction

FERCO

Ferco lever handle sets are uniquely designed to operate on multipoint door locks. Our handle sets withstand the rigourous everyday operational wear & tear of engaging or disengaging multiple lock points. **Our handle sets are designed for long term use!**

- **Patented handle snap-rings** allow for handles to be shipped non-handed. The manufacturer no longer has to worry about ordering left or right, and will save on inventory.

- **Handle setscrews to fasten spindles** combined with the snap-ring will ensure the handle will stay tight on the door for a long time.

- **Self centering 8mm split Spindle** to make sure it is always centered into the door.

- **Longer Screw ports on escutcheons:** Ferco has added an interior sleeve port that will guide the M5 mm screw straight to the opposing exterior screw port.

- **Exterior O-ring on handle shaft** to prevent water from entering around the exterior handle.

- **Washers between handle and escutcheon** making sure the handle operation is and remains smooth.

- **Escutcheon Foam gasket** to prevent air and cold.

- **Rubber gasket** (Order separately) to prevent air and water leakage around the exterior escutcheon.

- **Schlage Cylinder with one tail for both 1 ¾" and 2 ¼" thick doors**

- **M5 handle set screws to fasten the escutcheons** included in every handle set kit.

- **Handle above cylinder or handle below cylinder option**

- **FERCO handle sets available** in Solid Brass or economical zinc die-cast material with selections in many plate designs, lever styles and finishes.

Construction Key

Description	Color	PU	Part Number
Construction key	Black	10	9-U0001-01-0-0
		PU = Packaging Unit	

Additional information

The construction key is available for those who prefer to install the decorative hardware trim and lever sets on doors after the construction has been completed. Installing the escutcheon plates and levers in the final stage of construction prevents the decorative trim from becoming scratched or damaged.

The construction key has been designed to accommodate multipoint door hardware (8mm square), tilt-turn hardware (7mm square) and lift-slide hardware (10mm square).
