- **Patented handle snap-rings** allow for handles to be shipped non-handed. The manufacturer no longer has to worry about ordering left or right, and will save on inventory.
- **Handle setscrews to fasten spindles** combined with the snap-ring will ensure the handle will stay tight on the door for a long time.
- **Self centering 8mm split Spindle** to make sure it is always centered into the door.

- **Exterior O-ring on handle shaft** to prevent water from entering around the exterior handle.
- **Washers between handle and escutcheon** making sure the handle operation is and remains smooth.
