Get Hooked on Security!

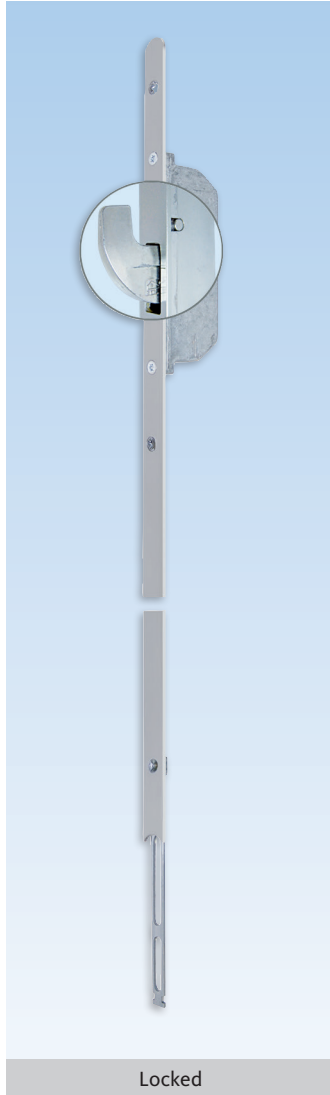

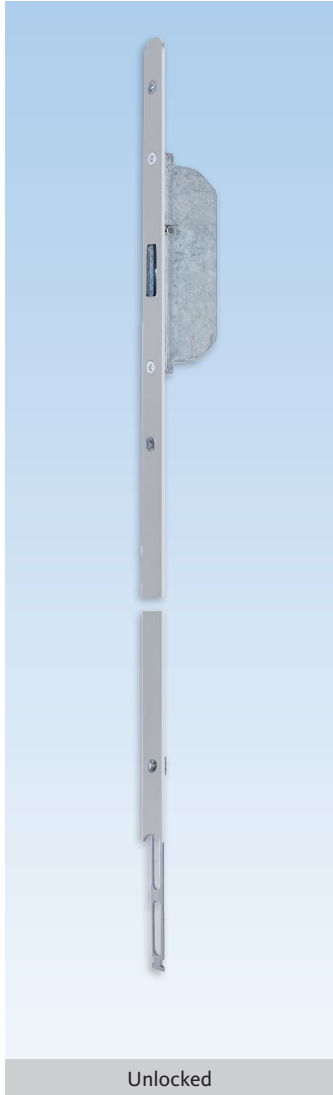

GU-SECURITY SH2 locking system activates by closing the door and lifting the handle upwards. This action will engage the hooks into the strike plates which enhances the weathersealing properties and provides maximum security. You then simply turn the key or the knob to allow the two hookbolts and deadbolt to extend into the strikeplates, securing the door in three positions

Additional information

- 3-point, one piece locking system for 6' 8" and 8' doors
- Heavy duty mortise construction with reinforced lever return spring system
- Locking by US-cylinder with 90° turn of key or thumb-turn
- Lever controlled engaging and releasing of deadbolt, and two hook bolts
- Two hookbolt 1" (25mm) lock in an upward direction providing an anti-lift device
- 1" (25mm) increased resistance against pullout throw on deadbolt
- Non handed, latch with build-in failsafe (anti-slam) easily reversible
- 8mm square spindle
- 92mm centres (spindle to cylinder)
- Handle height variable (36" recommended)
- 16mm stainless steel faceplate with radius ends for easy installation and cleaner look
- Same hardware groove detail throughout our entire door lock program (jig, router base and bits available)
- Extension with additional lock point is available for doors taller than 8' (6-36062-04-0-8B)
- To be used with lever handle set (US-cylinder above handle)

SH2 Extension

with Additional Hook Bolt

Extension			
Description	Color	PU	Part Number
525mm extension with rounded end	Stainless Steel	5	6-36062-04-0-8B
* = Color		PU = Packaging Unit	

Additional information

- Steel horn with 1" (25mm) projection
- 16mm stainless steel faceplate with radius end for easy installation and cleaner look
- Additional locking point for doors taller than 8'
- To be used with GU-SECURY SH2 door Locks (6-33935-XX-0-8B)

Ferco lever handle sets are uniquely designed to operate on multipoint door locks. Our handle sets withstand the rigorous everyday operational wear & tear of engaging or disengaging multiple lock points. **Our handle sets are designed for long term use!**

- **Patented handle snap-rings** allow for handles to be shipped non-handed. The manufacturer no longer has to worry about ordering left or right, and will save on inventory.
- **Handle setscrews to fasten spindles** combined with the snap-ring will ensure the handle will stay tight on the door for a long time.
- **Self centering 8mm split Spindle** to make sure it is always centered into the door.
- **Longer Screw ports on escutcheons:** Ferco has added an interior sleeve port that will guide the M5 mm screw straight to the opposing exterior screw port.
- **Exterior O-ring on handle shaft** to prevent water from entering around the exterior handle.
- **Washers between handle and escutcheon** making sure the handle operation is and remains smooth.
- **Escutcheon Foam gasket** to prevent air and cold.
- **Rubber gasket** (Order separately) to prevent air and water leakage around the exterior escutcheon.
- **Schlage Cylinder with one tail for both 1 ¾" and 2 ¼" thick doors**
- **M5 handle set screws to fasten the escutcheons** included in every handle set kit.
- **Handle above cylinder or handle below cylinder option**
- **FERCO handle sets available** in Solid Brass or economical zinc die-cast material with selections in many plate designs, lever styles and finishes.

- Locking/Unlocking from inside only

Construction Key

Description	Color	PU	Part Number
Construction key	Black	10	9-U0001-01-0-0
PU = Packaging Unit			

Additional information

The construction key is available for those who prefer to install the decorative hardware trim and lever sets on doors after the construction has been completed. Installing the escutcheon plates and levers in the final stage of construction prevents the decorative trim from becoming scratched or damaged.

The construction key has been designed to accommodate multipoint door hardware (8mm square), tilt-turn hardware (7mm square) and lift-slide hardware (10mm square).
