

Operation & Maintenance Instructions

for GU-SECURY Automatic Door Lock and Lever Handle

CARE & MAINTENANCE

To prevent build-up of surface contaminants possibly resulting in hardware surface deterioration and in some case appearance of rust; we recommend to wipe down with soft cloth all visible surfaces with warm water and mild soap. Then wipe the same surfaces with a clean cloth and warm water only and let surfaces dry completely. This procedure should be done a minimum of 2 times per year. The use of caustic cleansers or chemicals should be avoided.

For the handle set, all finishes except Oil Rubbed Bronze (O5), it is strongly recommended to apply a non-abrasive automotive wax to protect the surface.

In order to ensure the smooth operation of the lock over a long period of time, it is necessary to lubricate all movable parts and locking points (🔑) using acid and resin-free lubricants.
