DATA SHEET

SMART DOOR LOCK TEDEE-PRO

The smart lock allows you to remotely open the door to your home, apartment or business.

The TEDEE-PRO lock can be mounted on all FERCO handles and specific european cylinders. Easy and quick installation inside the door makes the lock invisible to outsiders.

It is possible to operate the device from the mobile application on Android, iOS systems via the Bluetooth / Wi-Fi connection. For the proper management of the device, it is necessary to install the Tedee mobile application. Tedee application work perfectly with Google Assistant, Amazon Alexa, Apple Siri and many others, which allows you to control connected devices using voice commands. It provides features such as remote operation, notifications, activity log, auto-open. The TEDEE-PRO smart lock is compatible with over 15 smart home systems (e.g. Apple HomeKit). To use these features, your TEDEE-PRO device must be paired with the smart TedeeBridge connected to internet.

When paired with the Tedee Keyboard, the lock can be opened with a PIN code or fingerprint reader (Keypad 2.o).

Application	opening and closing the lock
